ANTHURIUM

17.
Precrease.

18.
Rotate the model for
some 60° to get a
better view. Spread
the little triangle.

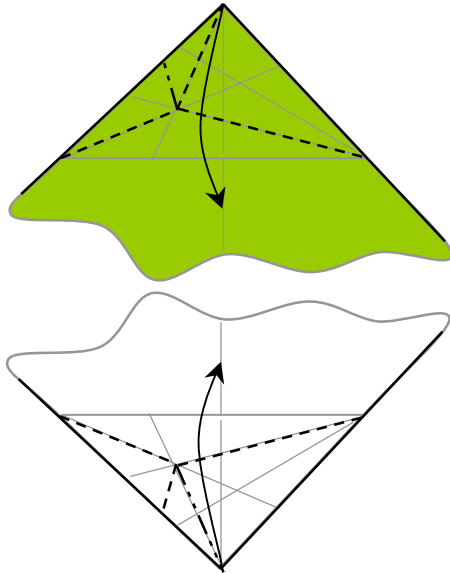

19.
If you prefer kasane
technique (two layers
folded as one):
Precrease both layers by
trisecting the lower right
angle.

20.
Bisect the half of the top
angle and the lower left
angle.

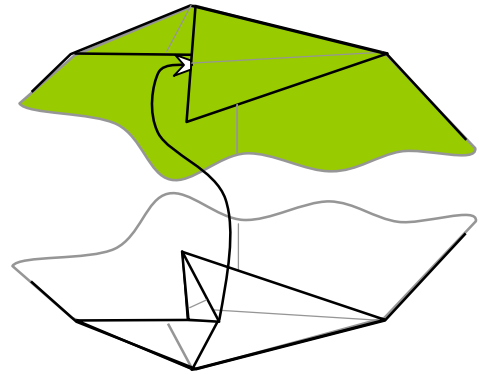

ANTHURIUM

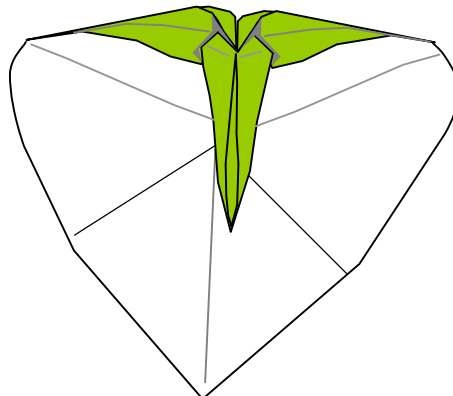

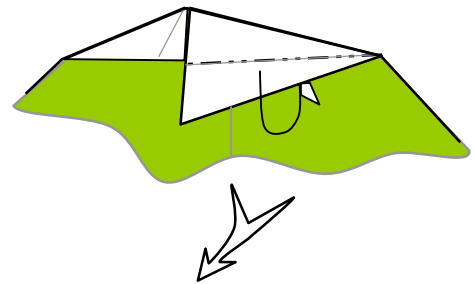

21.
Fold rabbit ears. They will be similar, but not quite the same.

22.
Lock the two layers together and round them together. Repeat on the other end.

22.a
If you are working with a duo paper, do as for the green flap on the green (reverse side). Finish by putting the longer flap in the pocket.
