Note: Since the model is completely color-symmetrical, it does not matter what side you start with.

1

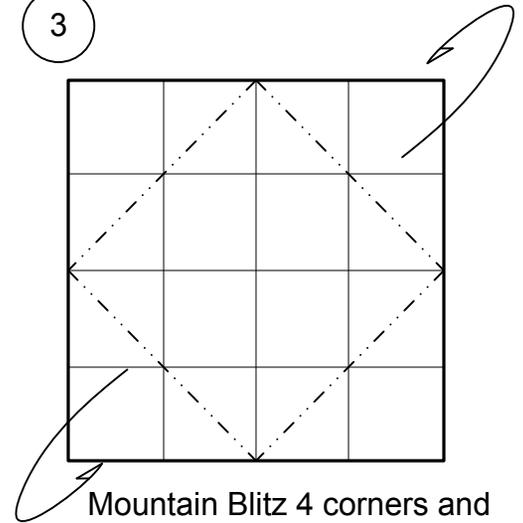

Fold and unfold 2 center lines

2

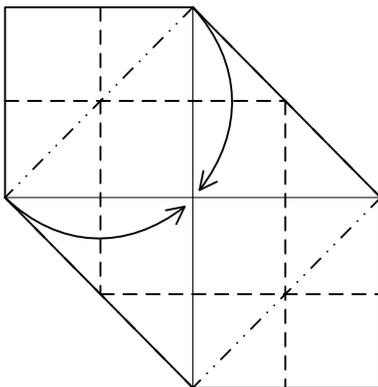

More pre-creases. This is the Froebel base

3

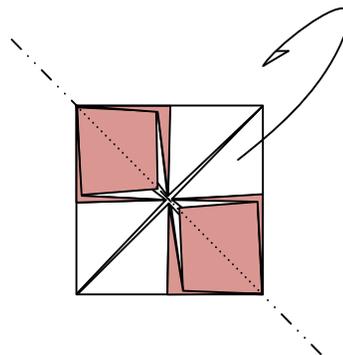

Mountain Blitz 4 corners and unBlitz 2 opposite corners

4

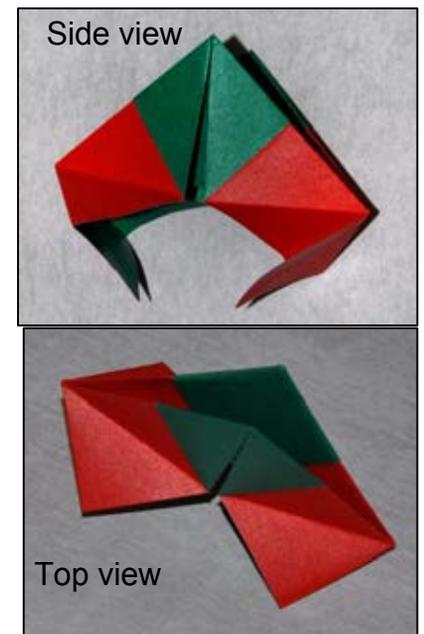

And collapse the twisted Froebel base...

5

...into this.
Fold the model in half, but leave the upper red flaps unfolded!!

6

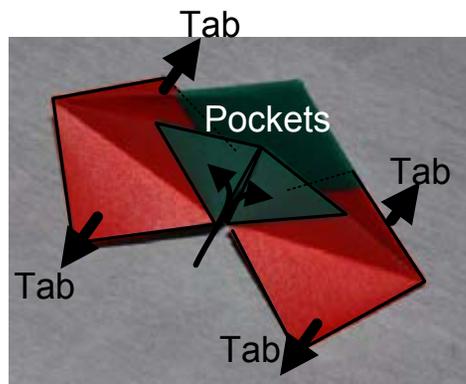

A Most Puzzling Christmas decoration

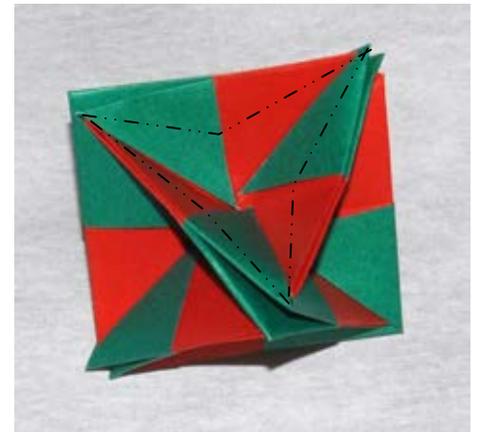

Design and diagram by Garibi Ilan, 2008

Assembly

Make 6 units.
connection is done by
inserting the red tabs
into the green pockets.
Create a full corner
first, by connecting
3 units.

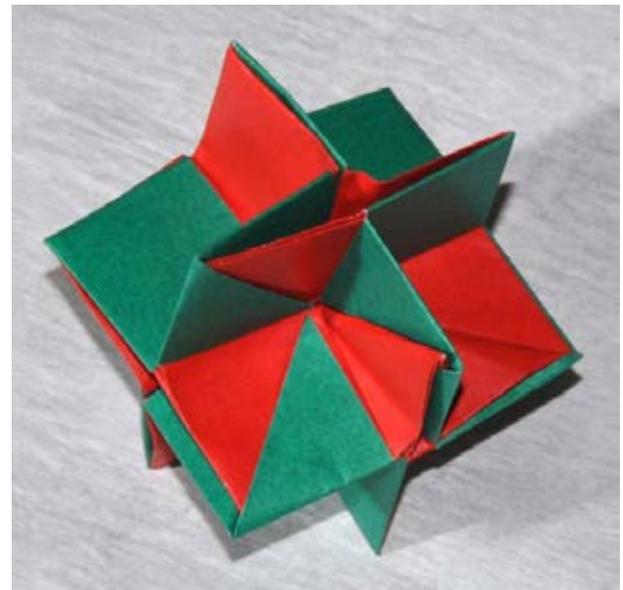

Tabs and pockets locations

Finalizing the model, you
can add folds as indicated,
and get the 6-points-Star
effect, but the model is nice
at this stage, too

Final model. Happy Xmas!!

This variation can be
achieved easily, by
changing the flap location.
Unfortunately, no diagrams
are available. Do try it
yourself!
