

The Bird Base

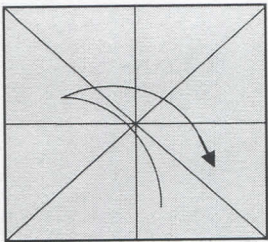

1. start with the white side up
Fold in half side to side then
Back

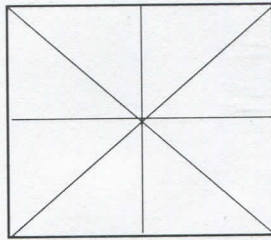

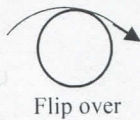

2. Valley fold in half from top to
bottom then back

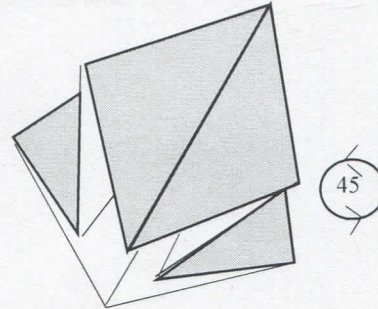

3. Valley fold diagonal
down then back up

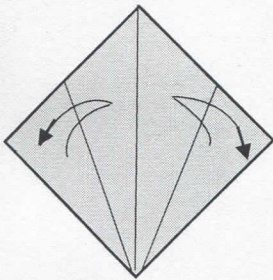

4. Valley fold other diagonal
down and back up

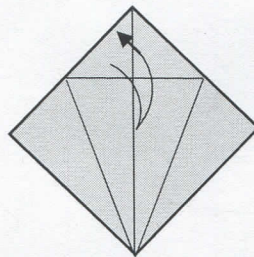

5. fold the four corners together
using existing creases

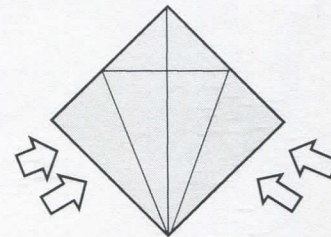

6. Intermediate step will fold
into a square with four pages
make sure the top is closed

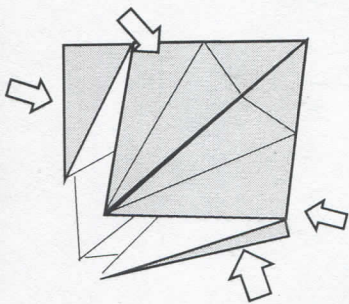

7. fold in the sides to the center
Line crease and open front and
back

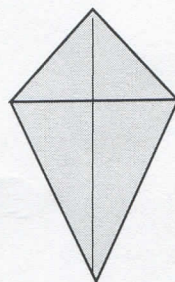

8. fold down where the new
creases meet the edge and
back up

9. Inside reverse fold along
the creases each of the four
petals go in

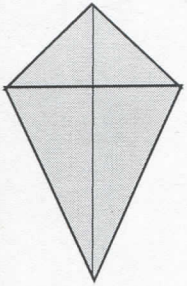

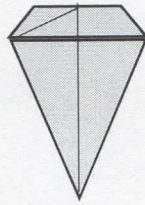

10. Intermediate step

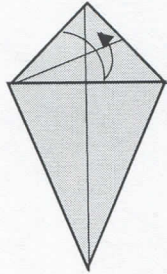

11. the completed bird base

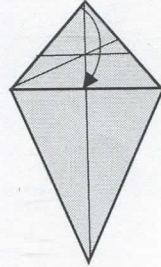

dinosaur Base

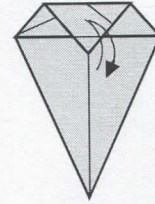

1. start with a bird base

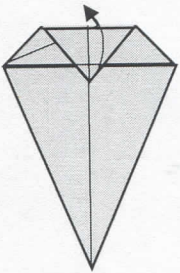

2. fold the top over to the
Horizontal crease

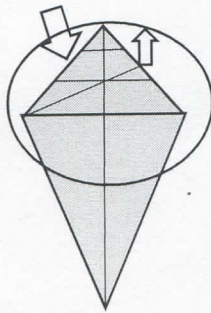

3. fold down and up where the
new crease intersects the middle

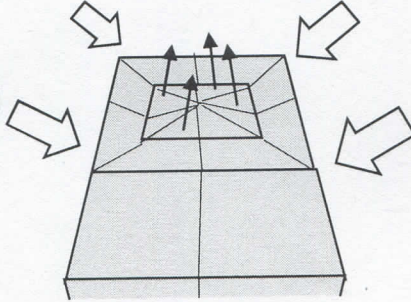

4. crease where the tip that passes
the horizontal crease

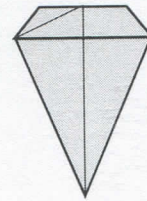

5. unfold back up

6. Spread sink down and up

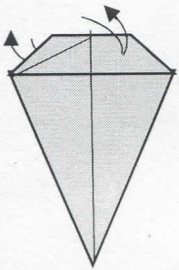

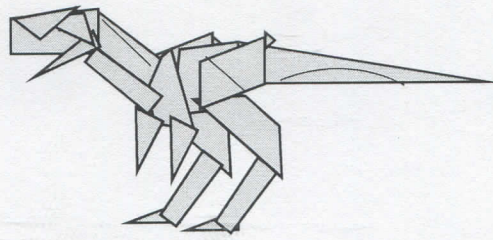

7. this is an intermediate step
It helps to open the model

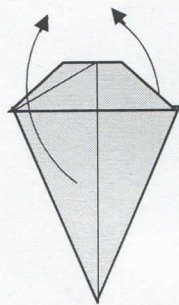

8. Like so this is the
finished dino base

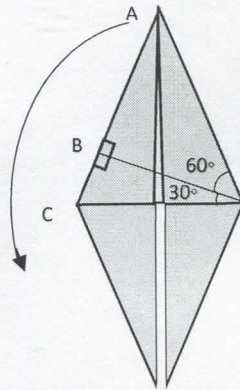

Tyrannosaurus Rex

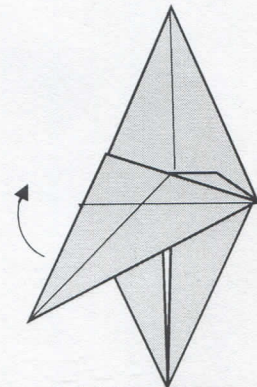

1. begin with the dino base
crease the tab front and
back

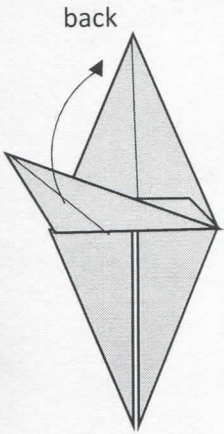

2. fold up the petals
front and back these
will become legs

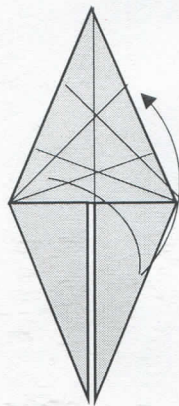

3. fold down the top point so
that line AB lies on BC

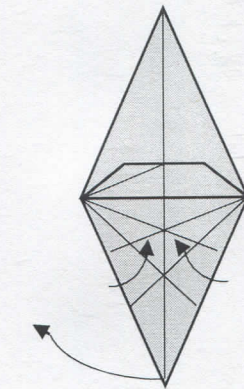

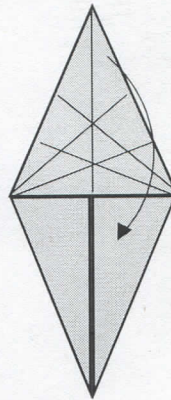

4. fold up along
the horizontal

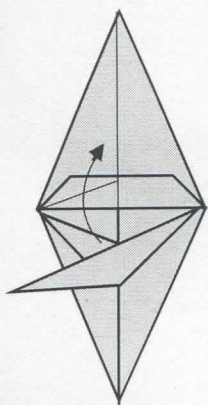

5. pull the petal back
up to step 3

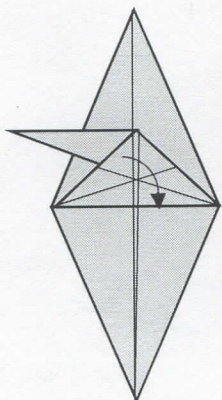

6. repeat steps 3 and 4 in
mirror image

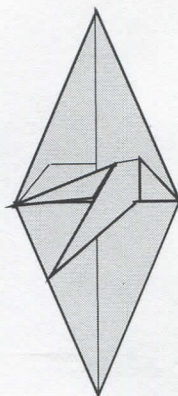

8. rabbit ear the
lower creases

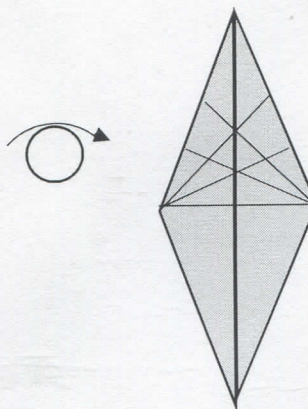

9. fold the leg up on
the horizontal crease

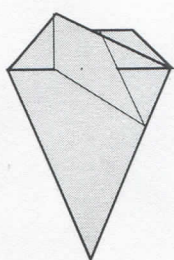

10. valley fold down
do not rabbit ear

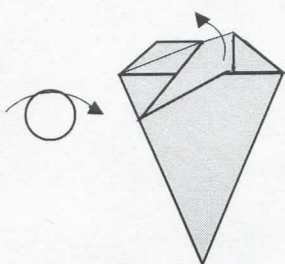

11. turn the model over

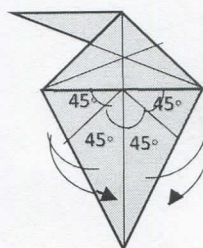

12. repeat steps 3 to 11
in mirror image

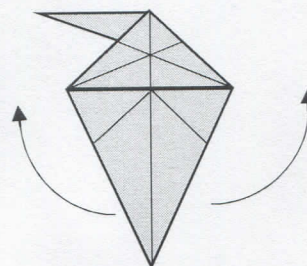

13. turn the model over

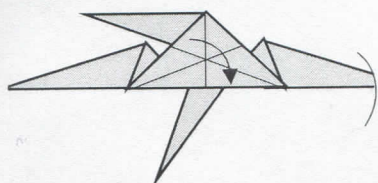

14. fold the leg up

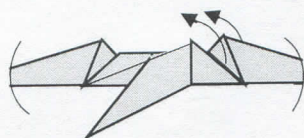

15. crease at 45°

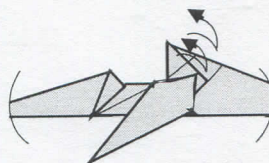

16. crimp up along
existing creases

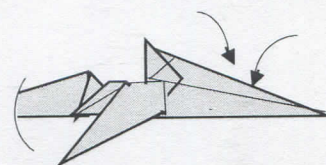

17. fold the leg back down

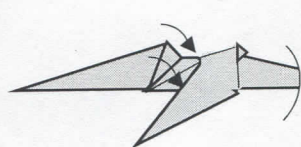

18. reverse fold up
the tail tabs

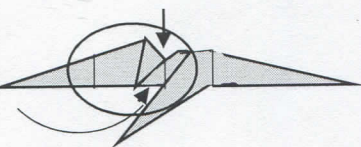

19. Crease the top
tips of the tail

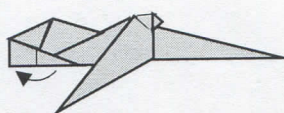

20. Thin the tail by folding
inside. Tabs will fold on
the existing crease

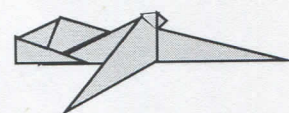

21. tuck the arm tabs
Inside

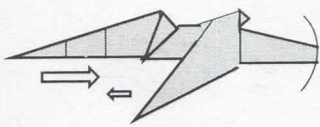

22. fold the tip to a point
directly below the dip

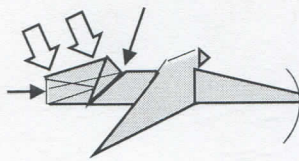

23. fold the tip back
to the front

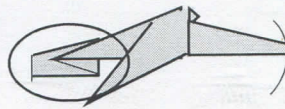

24. pull the jaw back out to
step 22

25. inside reverse fold then
outside reverse fold on
the existing creases

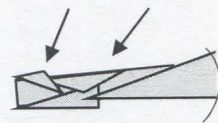

26. reverse fold down the
head at the two points
repeat behind

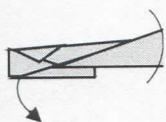

27. Reverse fold back up
crease only to the back
of the jaw

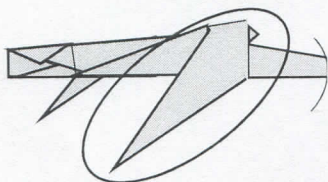

the head is not flat

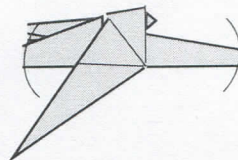

28. Fold down the tiny
triangle make a tiny crimp
at the jaw

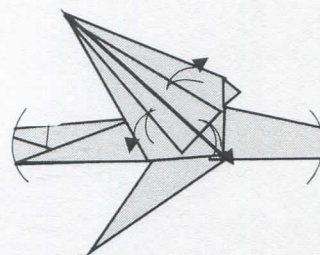

29. the head is now flat
Pull the jaw open

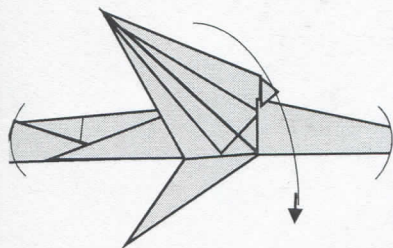

30. The next steps will
focus on the legs

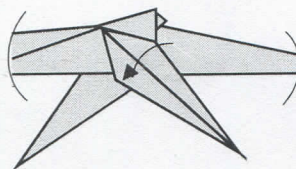

31. squash fold up on
existing creases

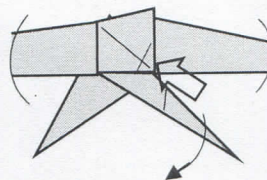

32. crease to the middle
and the bottom where
the new ceases meet

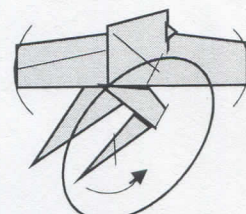

33. petal fold the leg down

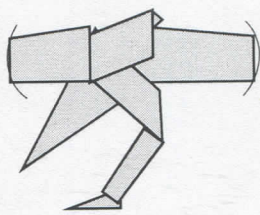

34. fold the leg in half
along its center

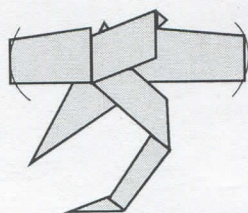

35. Reverse fold the
closed sink the tiny
pyramid

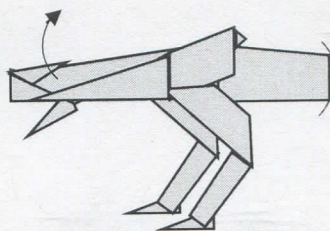

36. reverse fold back
the feet

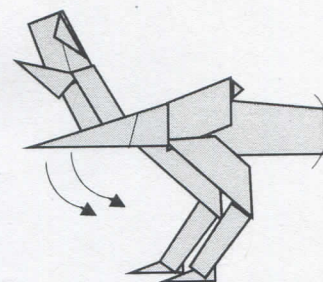

37. curve the foot so it
Has three points of contact

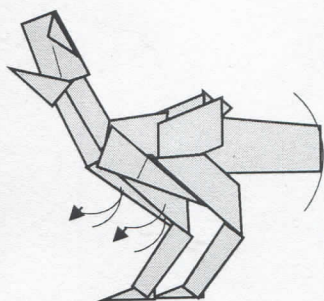

38. Turn the model over
repeat steps 31 to 37 to
form the other leg

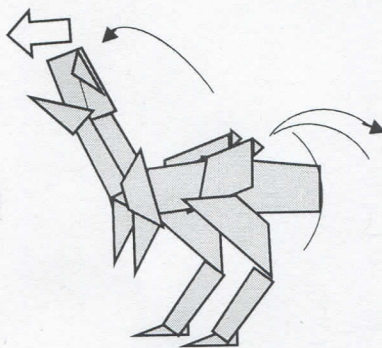

39. Crimp the neck up

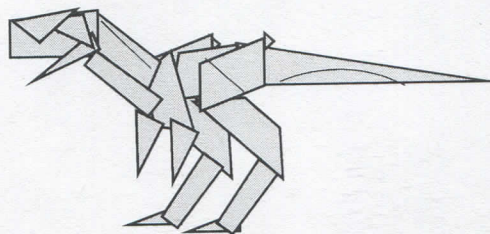

40. Fold the arms down

41. inside then outside
Reverse fold the arms

42.crimp the tail and head
swivel the neck forward
Swivel and shape to balance

43.the completed tyrannosaurus rex
